

## **Report On Attending the Green Finance Summit 2019**

This conference was invited by the British Office in Taiwan. The British government will cooperate with Oxford University and British green finance institution to hold the first international conference on green finance in London. This conference was aimed to learn the green finance new knowledge and strategies, and discuss the role of the public sector in the green finance system.

The key topics of the conference include: policies and measures adopted in response to climate change, greening the financial system, financing the green ,how to promote the development of green finance and one Sustainable Finance Course held by the Oxford University.

This report recommends that, in response to the international development trend of climate change risk management and related financial disclosure, FSC should continue to pay attention to the measures adopted by the Financial Conduct Authority and the "Climate Change Related Financial Disclosure Working Group (TCFD)" regarding climate change risk management and financial disclosure. In practice, the financial industry and listed companies are suggested to gradually strengthen the management of climate change risks and the transparency of related financial disclosures. The FSC can also actively participate in relevant international activities and continue to track the specific practices proposed by the UK and relevant international organizations as a reference for green finance policy.
