

## **Seminar on Practical Techniques for the Management and Measurement of Operational Risk**

**Basel, Switzerland, 24–26 October 2006**

### **Agenda**

#### ***Objectives***

The seminar will provide a platform for speakers and participants to discuss implementation and practical application issues related to operational risk management, measurement and capital allocation under Basel II.

Participants to the seminar are expected to have a broad understanding of the Basel Committee's recommendations on sound practices for the management and supervision of operational risk<sup>1</sup> as well as the proposed methodologies for allocating capital using the new capital adequacy framework. Access to the relevant FSI Connect<sup>2</sup> tutorials will be provided to assist participants with their review of the key elements of Basel II and its operational risk components. Participants should be prepared to actively contribute during the sessions and to share their local market and supervisory perspectives throughout the seminar.

#### ***Tuesday, 24 October***
