# FINTECH

*More Fintech,  
More Different*

The development of financial technology (FinTech) and high-tech applications across the globe in recent years have given rise to innovative cross-sector integration of finance and technology and increased the efficiency of financial services. To promote the development of FinTech in Taiwan, incubate FinTech businesses with potential, and cultivate FinTech talents to improve the competitiveness of the finance industry in Taiwan, the Taiwan Financial Services Roundtable has, under the guidance of the Financial Supervisory Commission, established the "Financial Technology Development Fund" with donations from 13 entities including the Bankers Association, Taiwan Securities Association, Chinese National Futures Association, Securities Investment Trust & Consulting Association, Life Insurance Association, Non-Life Insurance Association, Taiwan Stock Exchange, Taipei Exchange, Taiwan Futures Exchange, Taiwan Depository & Clearing Corporation, Financial Information Service Co., Ltd., Joint Credit Information Center, and National Credit Card Center. It is the first public welfare fund established with the resources and powers of the finance industry for the development of FinTech in Taiwan. We hope that the integration of cross-industry resources can achieve economies of scale, accelerate innovation in the finance industry, and demonstrate the capacity for financial innovation in Taiwan.

With the guidance of the FSC, "FinTech Taipei" has become a key annual event supported by the Financial Technology Development Fund. The Executive Yuan has included it as a key strategy for the Financial Development Action Plan. The event is organized by the Taiwan Financial Services Roundtable and Taiwan Academy for Banking and Finance. It integrates the resources of domestic and foreign FinTech companies, governments, academic institutions, and research institutions and makes use of regulatory technology (RegTech), artificial intelligence (AI), blockchain, virtual reality, and big data technologies. It provides domestic and foreign financial institutions, IT companies, and the public with opportunities for cooperation and learning through sensory, experience, and sharing. We hope that FinTech Taipei can be used to create a permanent FinTech innovation and communication platform so that we can jointly bear witness to Taiwan's potential in FinTech development.

### Industry Benefits

Expand Taiwan's FinTech ecosystem and bring together the finance and technology industries to create cross-sector value and co-create a platform for exchanging ideas.

### International Benefits

Make FinTech Taipei an exhibition brand for international FinTech innovation and combine the capacity for innovation in Taiwan and abroad to create synergy for mutually beneficial communication and development.

### Talent Cultivation Benefits

Focus on the needs of the participating businesses and integrate FinTech innovations and applications to create a one-stop multi-business and talent matching platform that strengthens cross-sector cooperation and talent exchange in FinTech.

The TFSR established the Financial Technology Development Fund in 2016 to promote the development of FinTech industries, create an innovation and entrepreneurship base for FinTech, incubate FinTech companies with potential, and cultivate FinTech talents. The Fund integrates the resources of the finance industry and makes use of the economies of scale and overall planning. We have established the FinTechSpace, organized FinTech exhibitions, cultivated FinTech talents, and conducted international exchanges and cooperation.

FinTech Taipei was established in accordance with the Financial Development Action Plan announced by the Executive Yuan in 2018. The in-person exhibition was held in 2018 and 2019 and it is now held again after a three-year hiatus. The pandemic has accelerated digital transformation in many industries and led to rapid developments in FinTech. According to statistics published by the FSC, investments by the finance industry in FinTech development will increase sharply this year with an investment of up to NT\$30 billion, which demonstrates the continuous increase in the growth of FinTech.

The key events this year included the FinTech Taipei exhibition, international forums and seminars, FinTech Taipei Awards, announcements by startups, and matchmaking. The FinTech Taipei Awards event was organized for the first time in accordance with the FinTech Development Roadmap of the FSC. It attracted 160 entries from nearly 100 institutions for the Technology Innovation Award, Innovative Business Model Award, Model Co-Creation Award, Global Market Potential Award, and FinTech Investment Award. The top institutions in FinTech will be selected and the award ceremony and demonstrations will be organized during the exhibition to demonstrate Taiwan's capacity for FinTech innovation and help teams with potential for international development step onto the global stage.

With the guidance of the FSC, the sponsorship by donors of the Financial Technology Development Fund, and the support of trade associations, institutions, and other entities of the finance industry as well as the representative offices of foreign countries in Taiwan, FinTech Taipei created record highs in terms of the scale of the exhibition and attracted participants from 17 countries. It has become Taiwan's largest FinTech event and platform for the exchange of ideas. In the future, we shall continue to use diverse resources from domestic and foreign companies, governments, and academic and research institutions to enhance Taiwan's capacity for innovation and strengthen connections with the international community, and empower growth in Taiwan's FinTech ecosystem.

Finally, the TFSR wishes to thank participants from all sectors for participating in the event. We hope that the in-person exhibition this year can overcome the difficulties of the pandemic and bring about more FinTech innovation in the post-pandemic world to create better opportunities for FinTech development. More Fintech, More Different!

Taiwan Financial Services Roundtable Co.,Ltd.  
Acting Chairperson

FinTech Taipei 2022 is organized jointly by the Taiwan Financial Services Roundtable and Taiwan Academy for Banking and Finance with the guidance of the FSC in the 5th edition of the exhibition this year. In-person exhibitions were organized in 2018 and 2019 and supported by the people. More than 80,000 attendees participated in the events in 2018 and 2019. Due to the pandemic in 2020 and 2021, the exhibition was held by means of FinTech forums. We invited domestic and foreign experts to attend in-person and online meetings, which also attracted tens of thousands of participants with exceptional results.

FinTech Taipei has withstood the test and challenges of the pandemic with abundant energy. "FinTech Taipei 2022" is expanded in the form of an in-person exhibition in response to the strong support from all sectors as the pandemic subsides. Experts and representatives from more than 200 domestic and foreign financial institutions from the United States, United Kingdom, Canada, Australia, Poland, Israel, Hungary, Turkey, Lithuania, Luxembourg, India, Japan, Singapore, Hong Kong, Denmark and Taiwan will take part in the exhibition.

FinTech Taipei is organized as an in-person exhibition again with "virtual characters in exhibition interactions" so that participants can experience the virtual and real integration of the venue and virtual characters, and experience the true value of services provided by FinTech to satisfy consumer demand. In the professional discussions, the "International FinTech Forum" on the first day focuses on exploring three major themes including digital identity, RegTech, and sustainable finance. The discussions on the second day are based on applications for different settings and technological innovations in the "FinTech Applications Seminars". The forum and seminars include speeches and attendance in panel discussions of a total of 70 experts from 11 countries. The two-day exhibition is expected to attract more than 10,000 visitors and demonstrate the abundance and diversity of FinTech in Taiwan.

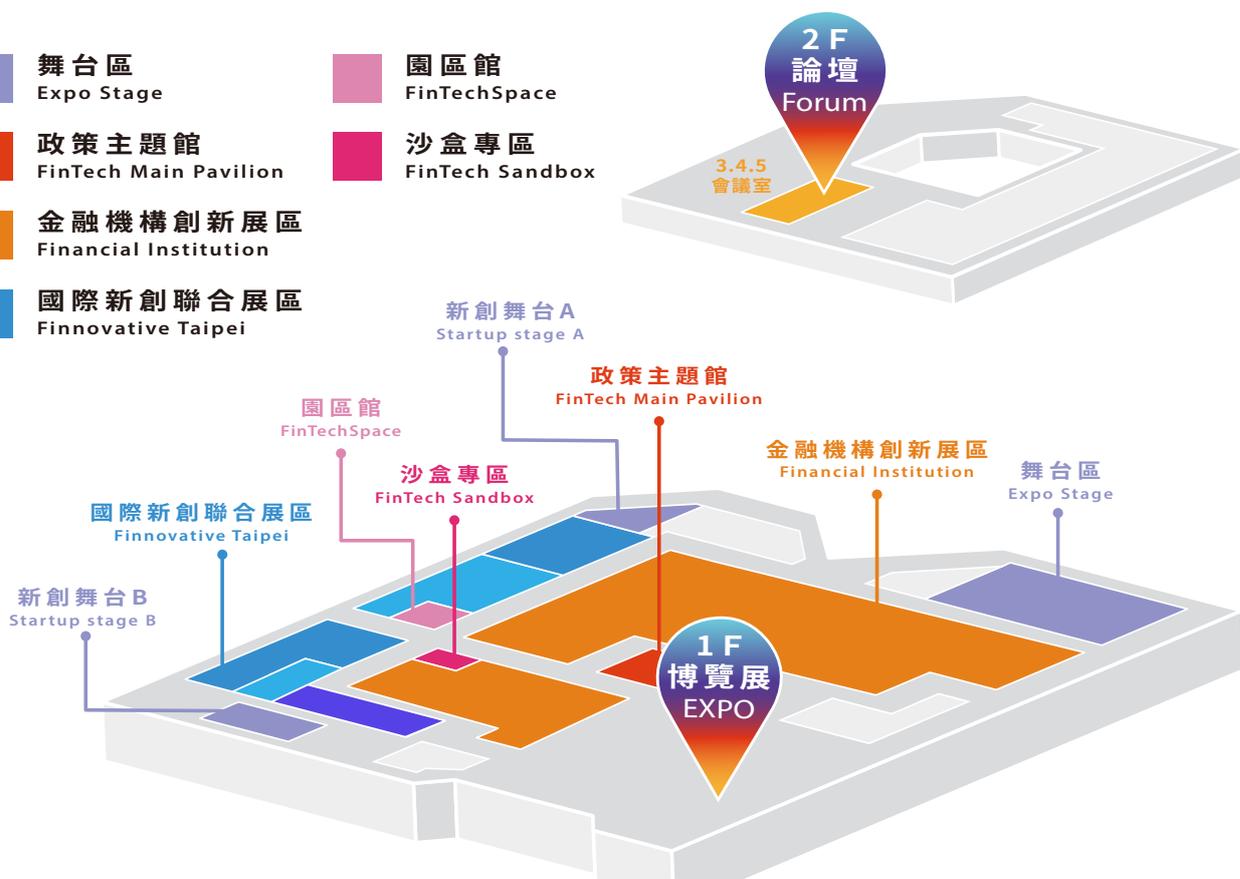

In the future, the finance industry will become a microcosm of the overall national economy and an important core element that drives Taiwan's future growth. The development of FinTech demonstrates the vitality and innovation in the finance industry. The FinTech Taipei exhibitions in the past few years have built an international stage that connects Taiwan to the world. We aim to continue to use the stage in the future to expand Taiwan's financial innovations across the world, and allow the public to experience the convenience and security of a wide range of digital financial applications. We believe that the creative power of FinTech will make our life and society better and increase the competitiveness of the industries.

## 2022 EXPO Event

### FinTech Taipei EXPO (Free Admission)

Oct. 28 - Oct. 29 | TWTC Hall 1, 1st Floor

The exhibition includes financial institutions, major international tech companies, and domestic and foreign startup teams and accelerators who showcase their latest FinTech applications in blockchain, AI, and big data. The unique characteristics of the booths are connected for visitors to learn about the latest FinTech applications and international trends with ease.

### FinTech Main Pavilion (Free Admission)

Oct. 28 - Oct. 29 | TWTC Hall 1, 1st Floor

As the pandemic continues, the population becomes used to remote and touch-free ways, and financial institutions are making the digital transition and growing leaner more quickly. The Policy Pavilion is built on the direction of fintech policies this year and reflects changes in banking in the post-pandemic future. The pavilion shows how fintech in Taiwan is constantly evolving and bringing smarter, easier, safer, and more sustainable banking.

### Domestic and International FinTech Startups Demo Show (Free Registration)

Oct. 28 - Oct. 29 | TWTC Hall 1, 1st Floor, Startups Stage A+B

FinTechBase has invited fintech startups from around the world and global accelerators to speak on selected startup highlights and trends, supplemented with speeches on fintech trends worldwide, global innovation, and features of global accelerators. FinTechSpace has also invited cross-industry collaboration and investment departments of venture capital firms and financial institutions to participate in the event.

### FinTech Talks (Free Registration)

Oct. 28 - Oct. 29 | TWTC Hall 1, 1st Floor, Main Stage

The organizers have invited financial institutions, IT and telecommunication, and fintech companies from around the world to share fintech results and solutions. The organizers have also invited major international tech companies to speak on leading technologies and trends and unicorns to speak on case studies from around the world.

## 2022 EXPO Forum

### International FinTech Forum (Free Registration)

Oct. 28 | TWTC Hall 1, 2nd Floor

The forum focuses on three topics, New Use of Digital Identity, New Digital Banking Regulations, and New Future of Sustainable Banking. Fintech experts from USA, UK, Australia, India, Israel, Luxembourg, Poland, Canada, and Denmark are invited to in-depth discussions. These discussions will contribute to progress in fintech and adoption of international practices in Taiwan.

### Fintech Application and Practice Seminar (Free Registration)

Oct. 29 | TWTC Hall 1, 2nd Floor

Experts from different sectors, including banking, technology, and fintech, are invited to join panels and speak in terms of industry, technology, service, and ecosystem in discussions on development in fintech and trends in technology.

# FinTech Main Pavilion

Welcome to the FinTech Main Pavilion and a journey into Fintech!

## Four areas of Policy Pavilion

1  
Chapter

### Chapter I: Intelligence

The centennial evolution of banks shows progress in the forms of banking.

2  
Chapter

### Chapter II: Convenience

The COVID-19 pandemic has contributed to faster technological advances and made remote services a rising star. Open banking and autonomous use of personalized information (MyData) bring more convenience to the everyday life.

3  
Chapter

### Chapter III: Security

With so many scams and InfoSec incidents in the news, InfoSec technologies, telecommunication fraud prevention, and money laundering prevention join force to create a security network.

4  
Chapter

### Chapter IV: Sustainability

Now the mainstream, ESG is not only relevant to businesses, but also presents everywhere in the everyday life.

## More Fintech, More Different!

The pavilion is designed to provide useful information on the government's key policies. Topics on display include evolution of banking, insurance passbook, remote services, open banking, autonomous use of personalized information (MyData), information security, money laundering prevention, telecommunication fraud prevention, and sustainable finance. Join us at the FinTech Main Pavilion and experience the appeal and advantage of Fintech!

## Banking and Technology Together for A New Lifestyle

The FinTech Main Pavilion has invited experts from various fields. The contents are delivered in a cheerful and easy-to-relate manner to better guide visitors to explore the future of financial lives. The journey begins with the freshly unveiled financial adventure area, "Centennial Evolution of Banking" from Financial Explorer 62, which takes visitors through the Japanese Colonial Period, Taiwan Miracle, Computerization, Modern Smart Banking, and Future Virtual Banking scenarios and Fintech enabled smart living in the future.

Next, the Life Insurance Association of the Republic of China brings Cathay Life Insurance, Taiwan Life Insurance, and Yuanta Life Insurance to showcase the insurance passbook and remote services. Far EastOne Telecommunications demonstrates the second stage of open banking through a financial planning app. TWCA helps visitors experience how autonomous use of MyData can make banking easier in the future.

As scams become more frequent and more evolved, global information security faces greater threat than ever. How will Fintech make it safer? CyCraft Technology will showcase endpoint detection and protection solutions. Trend Micro will present anti-virus and anti-spam tools. The National Communications Commission presents a new generation of anti-fraud strategies; and the Anti-Money Laundering Office of Executive Yuan presents actions and results in anti-money laundering and countering financing of terrorism and proliferation.

Finally, in response to the increasing ubiquity of ESG, CRIF, Unity Sustainability, and Microsoft Taiwan are cohosting the ESG Green Finance Certification Project with the aim to encourage small- and medium-sized enterprises and financial institutions to accelerate ESG sustainability transformation.
